## Technological Solutions

Our company provides equipment, systems and solutions to meet these three objectives:

Environmental  
Care

Quality  
Improvement

Cost  
Reduction

# Company Profile

Cosmaca SRL has more than 35 years of experience providing equipment and technological solutions to companies in Argentina and throughout the American continent.

Under the ISO 9001-2015 certification, we manufacture the most complete line of Conarlub® equipment for the purification and maintenance, in perfect conditions, of several industrial oils; such as insulating oils, hydraulics oils, turbine oils, gear boxes oils, etc. Also we manufacture oil water separators; tramp oil separators and a large line of equipment to recycling coolants and wash waters. Filters for water using in cooling towers, chillers, etc.

Cosmaca designs and manufactures equipment under the strictest quality standards, using its own components and branded products, resulting in highly reliable, versatile and very low maintenance products.

Cosmaca SRL is approved by:

And is associate to the following chambers:

- Equipment and systems for recycling coolants and cutting oils.
- Equipment for coolants in central systems and local machines.
- Tramp oil separators.
- Hydraulic oil purifiers.
- Sump cleaners for tool machines.
- Water filtering equipment for welding robot cooling process.

- Degreasing and washing bath recycling equipment, before painting process.
- Magnetics filters.
- Oil mist filters.

- Hydraulic oil Purifiers.
- Oil purifiers for gear box and mills.
- Oil and fat separators from waste water.
- Oil water separators.

- Process and cool Water automatics filters.
- 1 micron Biofuel filters.

- Turbine Oil filtering and dehydrating purifiers.
- Insulating oil high vacuum purifiers. For Filtering, dehydrating, degassing and inhibitor additive adding process.
- Regeneration systems. Eliminating the components that generate acidity, improve color and restored, in addition, the characteristics of the new oil.
- Insulating oil coolers equipment, reduce the transformers operating temperature.
- Oil Varnish filter equipment.
- Vacuum drying systems.

- Hydraulic oil purifiers.
- Gear box oil purifiers.
- Oil and fat water separators.
- Water filters for large flows.
- Process water and cooling towers filter equipment.
- Refrigeration compressors oil purifiers
- Magnetic separators

- Equipment and systems for recycling coolants and cutting oils.
- Equipment for coolants in central systems and local machines.
- Hydraulic oil purifiers.
- Oil water separators
- Magnetics filters.
- Oil mist filters.
- Bacteria eliminators (without chemicals)
- Tramp oil separators.
- Sump cleaners for tool machines.
- Degreasing and washing bath recycling equipment.

# Technology Solutions for Mining Companies

Management  
System  
ISO 9001:2015

www.tuv.com  
ID 9108645161

- Conditioning equipment of worn industrial oils for later use as fuel in furnaces and heating.
- Equipment to recycling water used in washing yards for industrial equipment and heavy machinery.
- Oil water separators.
- Hydraulic, turbine, compressor and other lube Oil Purifiers.
- Insulating Oil Purifiers.
- Portable Oil control Kits.

- Oil purifiers for gear boxes, turbines, air and gas compressors, etc.
- Insulating oil vacuum purifiers.
- Recycling systems for heavy equipment wash water.
- Filtering systems for Cooling towers and water-flood injection/reinjection protection.
- Gas separators.
- Oil water separators.

- Conarlub oil purifiers, for turbine oils, gears oils and also for bearings / bushings of dryers cylinders.
- Hydraulics oil purifiers.
- Heat transfer oil filter systems.
- Insulating oil purifiers.
- Oil water separators.

- Portable mini-labs for oil analysis and on line oil control analyzers.

- Compressors oil purifiers.
- Oil water separators.
- Filtering equipment for process water and Cooling towers.
- Oil control minilabs
- Turbine oils purifiers.
- Particle & water counters

- Filtering and dehydrating hydraulic oil purifiers.
- Filtering equipment for process water and cooling towers, without filtering elements and free maintenance.
- Oil water separators.
- Magnetic separators
- Oil water separators
- On line particles & water counters
- Oil control minilabs

# Technology Solutions for Steel Mills Companies

Management  
System  
ISO 9001:2015

www.tuv.com  
ID 9108645161

→ Oil purifiers for gear box, turbines, air and gas compressors, hydraulics systems, etc.

→ Filtering equipment for Steel process fluids, process water, cooling towers, even for large flows.

→ Magnetic separators

→ Tramp Oil separators.
